**Portfolio:** [https://tinyhumann.github.io/QA\\_Portfolio/](https://tinyhumann.github.io/QA_Portfolio/)

## PROFILE

---

I'm a QA engineer who focuses on automation and practical results. Over the last three years I've built and maintained end-to-end and API test suites for fintech and health-tech products using Playwright, Cypress and Selenium. I integrate tests into CI pipelines (GitHub Actions / Azure DevOps) so bugs are caught earlier and releases are faster. I enjoy solving flaky tests, improving test coverage, and working closely with developers and product owners to make sure what we ship actually works for customers.

## SKILLS

---

**Automation & Frameworks:** Playwright, Cypress, Selenium WebDriver, Page Object Model, BDD (Cucumber)

**API & Tools:** Postman, Newman, REST API testing, Swagger

**Languages:** JavaScript (Node.js), Python, basic C#

**CI / Reporting:** GitHub Actions, Azure DevOps, Jenkins, Docker (test runners), Allure / HTML reports

**Databases:** PostgreSQL, MS SQL Server (basic SQL)

**Process:** Test strategy, test plans, Agile (Scrum), Jira, clear stakeholder communication

**Soft Skills:** Project Management, Communication & Collaboration.

## EXPERIENCE

---

### Quality Assurance Engineer (Automation)

June 2021 – August 2024

#### WellaHealth

- Designed and executed comprehensive test plans, ensuring software reliability and quality.
- Implemented automated testing scripts, reducing bug resolution time by 20% and improving testing efficiency
- Conducted thorough API testing with Postman and web testing with Selenium, expanding test coverage and ensuring seamless user experiences.
- Developed and deployed a mini bot that automated routine customer service tasks, resulting in faster response times and reduced manual workload.

### Project Manager

December 2024 - September 2025

#### LemFi Design Lead

- Spearheaded end-to-end operations for the Lemfi design lead podcast and Journal Company, driving timely deliverables and cross-functional collaboration.
- Agile project management practices, resulting in a 20% boost in efficiency and streamlined workflows.
- Fostered strong stakeholder relationships, aligning creative and business objectives to drive cohesive outcomes

### Finance & Strategy Intern

August 2024 – November 2024

#### Wema Bank Head Office

- Rotated through diverse units, including Financial Control, Revenue Assurance, and Corporate Strategy, gaining a broad understanding of business operations and stakeholder needs.
- Collaborated on a cross-functional team project, achieving a 30% improvement in UI testing speed.
- Contributed to strategic initiatives, including investor relations reports and research, driving analytical and reporting accuracy.

## **Software Engineer**

May 2020 – May 2021

### **WellaHealth**

- Developed software features with clean, maintainable code using JavaScript and Python
- Collaborated with UI/UX designers and senior engineers to deliver scalable solutions.
- Supported project reporting and documentation for milestones.

## **EDUCATION**

---

### **University of Lagos, Nigeria**

#### **Bachelor of Science in Economics**

2020 – 2025

## **PROJECTS**

---

- Automated Javascript Test of the-internet website
- Automated Javascript Test of WellaHealth azure website MTN Marketplace Integration
- Automated C# Test of WellaHealth Agent Portal
- Manual Testing of WellaHealth Pharmacy App
- Automated lemfli onboarding process testing
- ALAT test plan
- Automated Amazon shopping and cart filtering
- Saucedemo website manual testing
